Sustaining Measures Lost Efficiency as Session of Market Advanced,

#### VOLUME OF TRADE LARGER

Conviction General That Operations Are Still in Hands of Professionals.

(By Associated Press.)

NEW YORK, June 5.—The added breadth to the stock market caused by yesterday's accession of speculative activities was still in evidence to-day in the sustained volume of the trading-compared with last week's small daily average. The results of the larger operations were, however, somewhat mixed. It was easy to see that some of the principal stocks in yesterday's market were being fed out to take profits on the higher level. The effect was seen in the holding back of the prices of these stocks, while other stocks were advancing. The conviction remained general that the stock market was still in the hands of the professional operators. The confidence of the present professional movers in the market is avowelly based on the prospect that money is in course of accumulation on bank reserves, where its enforced dideness is likely to force it into stocks for employment.

In addition, the news from the crops is regarded as satisfactory and as warranting an assumption of prosperous harvests in the event of conditions continuing as favorable as at present. The movements to-day were irregular throughout by reason of a series of sustaining advances, accompanied by simultaneous realizing at different points. The sustaining measures lost their efficacy as the day advanced, and a general reaction set in, making the closing easy.

Bonds were steady; total sales, par value, \$3,575,000. United States bonds money on call easy, \$3\pi 3 1-2 per cent.;

MONEY AND EXCHANGE—CLOSE: Money on call easy, 3@3 1-2 per cent.; ruling rate, 3 1-4 per cent.; closing bid. 5 per cent.; offered at 3 1-4 per cent. Time loans easier on short rates; sixty days. 4@4 1-4 per cent.; interty days, 4 1-4@4 1-2 per cent.; six months, 4 1-2@4 3-4 per cent. Prime mercantile paper, 5@5 1-2 per cent. DANVILLE TOBACCO MARKET.

Reported by Dibrell 1904.

(Reported by Dibrell 1904.)

Danville, Va., June 5, 1936.

The farmers have taken advantage of the fine senson we have recently had to set out the tobacco crop, and we estimate that fully 90 per cent. to 90 per cent. of the crop has been planted up to this time. For this reason the farmers have been kept guite busy at home, and consequently our sales have been very light. There is still some little tobacco left in the farmers' hands, which we think will be sold within the pext two or three weeks.

N. & W. Report.

(Special to The Times-Dispatch.)

NEW YORK, June 5.—The April report of the Norfolk and Western agrees in a general way with the April report of the Norfolk and Western agrees in a general way with the April reports of other soft conl roads on which strike troubles of the early spring were slight. The suspension in the anthracite fields, probably because of the overstocked condition, of all markets, did not cause an overwhelming rush to by soft coal. It probably did have some effect in keeping up, a moderate volume of coal shipments. The April net carnings of the Norfolk and Western were \$120,000 ahead of those of April, 1905, but \$85,000 behind those of April, 1905, but \$85,000 behind those of April, 1905, but \$85,000 behind those of March, this year. The average monthly gain in net for the ten months of the fiscal year was \$170,000 gain in net to a gain of \$1,240,000 in surplus, applicable to dividends. At the time the January earnings appeared a calculation was made in these columns on the carning power of Norfolk and Western common stock for the current fiscal year. With actual figures for seven months and estimates on the other five, the surplus applicable to dividends was put at \$7,085,000, equivalent to the full dividend on the preferred stock, and 2.7 per cent. on the common.

held up very firm, and there were no changes in prices.

The wagons that are coming in and supplying the retailes with garden truck from nearby counties are rather upsetting Cary Street business so far as vegetables are concerns, but this kind of thing always happens about this time of each year, generally a little borner than this year.

#### Leaf Tobacco Market.

Leaf Tobacco Market.

There were three small warehouse sales yesterday at Shockoe. Stonewall and Sholburae's the total more said was about \$6.00 pounds. The total more said was about \$6.00 pounds are supplied Most of the goods were infectilers, but several piles of sun-cured wrapners showed up, and they brought good figures, some piles going as high as \$20.

The indications are that the breaks will be much larger to-day. Up to the present time there have been no sales by sample on the floor of the Tobacco Exchange.

## Cotton Letter

By MILLER & COMPANY.

(Special to The Times-Dispatch.)

NEW YORK, June 5.—Efforts to boost Liverpool this morning on yesterday's bureau figures failed dismally, this early advance of five to six points being followed by a decline of 10 points, leaving the close four to five points under last Friday's level. The immediate cause of the sharp break in Liverpool was the indifference displayed by our market, which, however, was not surprising. In view of the fact that ispot sales in Liverpool were only 5,000 bales. On its face, this seemed an indication that spinners, at least, did not consider the government's figures bullish, and were prepared to stay out of the market on any attempt to advance prices.

A new low level was established for July here—10:45—while the far months declined within 1 point of the low level of last week. There was considerable steadless displayed, however, at the new level. Profit-taking by shorts was quite general, and some houses are taking the long side in anticipation of a good rully. This disposition will broaden the market materially and make it much less of a one-sided affair than it has beer of late. The weekly weather report was, on the whole, favorable, although North Carolina has not yet had sufficient rain, and drouth or louding. Everybody seems convinced that any serious damage to the new crop would be the signal for a sharp upward movement, the difference of opinion lying between the advisability of buying cotton now and holding it for a change for the worse in crop prespects, or taking ndvantage of continued favorable continues under under under the soil it in the belief that premature buyers will tire of their task and unload, unless unfavorable conditions develop speedily.

Liverpool is due to come 2 points lower on mear months, and 2 points higher on new crop.
